

Engage with your regional museums, parks, and libraries for community resilience.

Carla Herrán,¹ Marcie Benne,¹ Robert de Groot,² Jenny Crayne¹ | CRESCENT Meeting, 2024

Earthquake resilience and free-choice learning

Free-Choice Learning Environments (FCLEs) are uniquely positioned to support public education about earthquakes and earthquake resilience. FCLEs engage broad, diverse, and multi-generational learners.

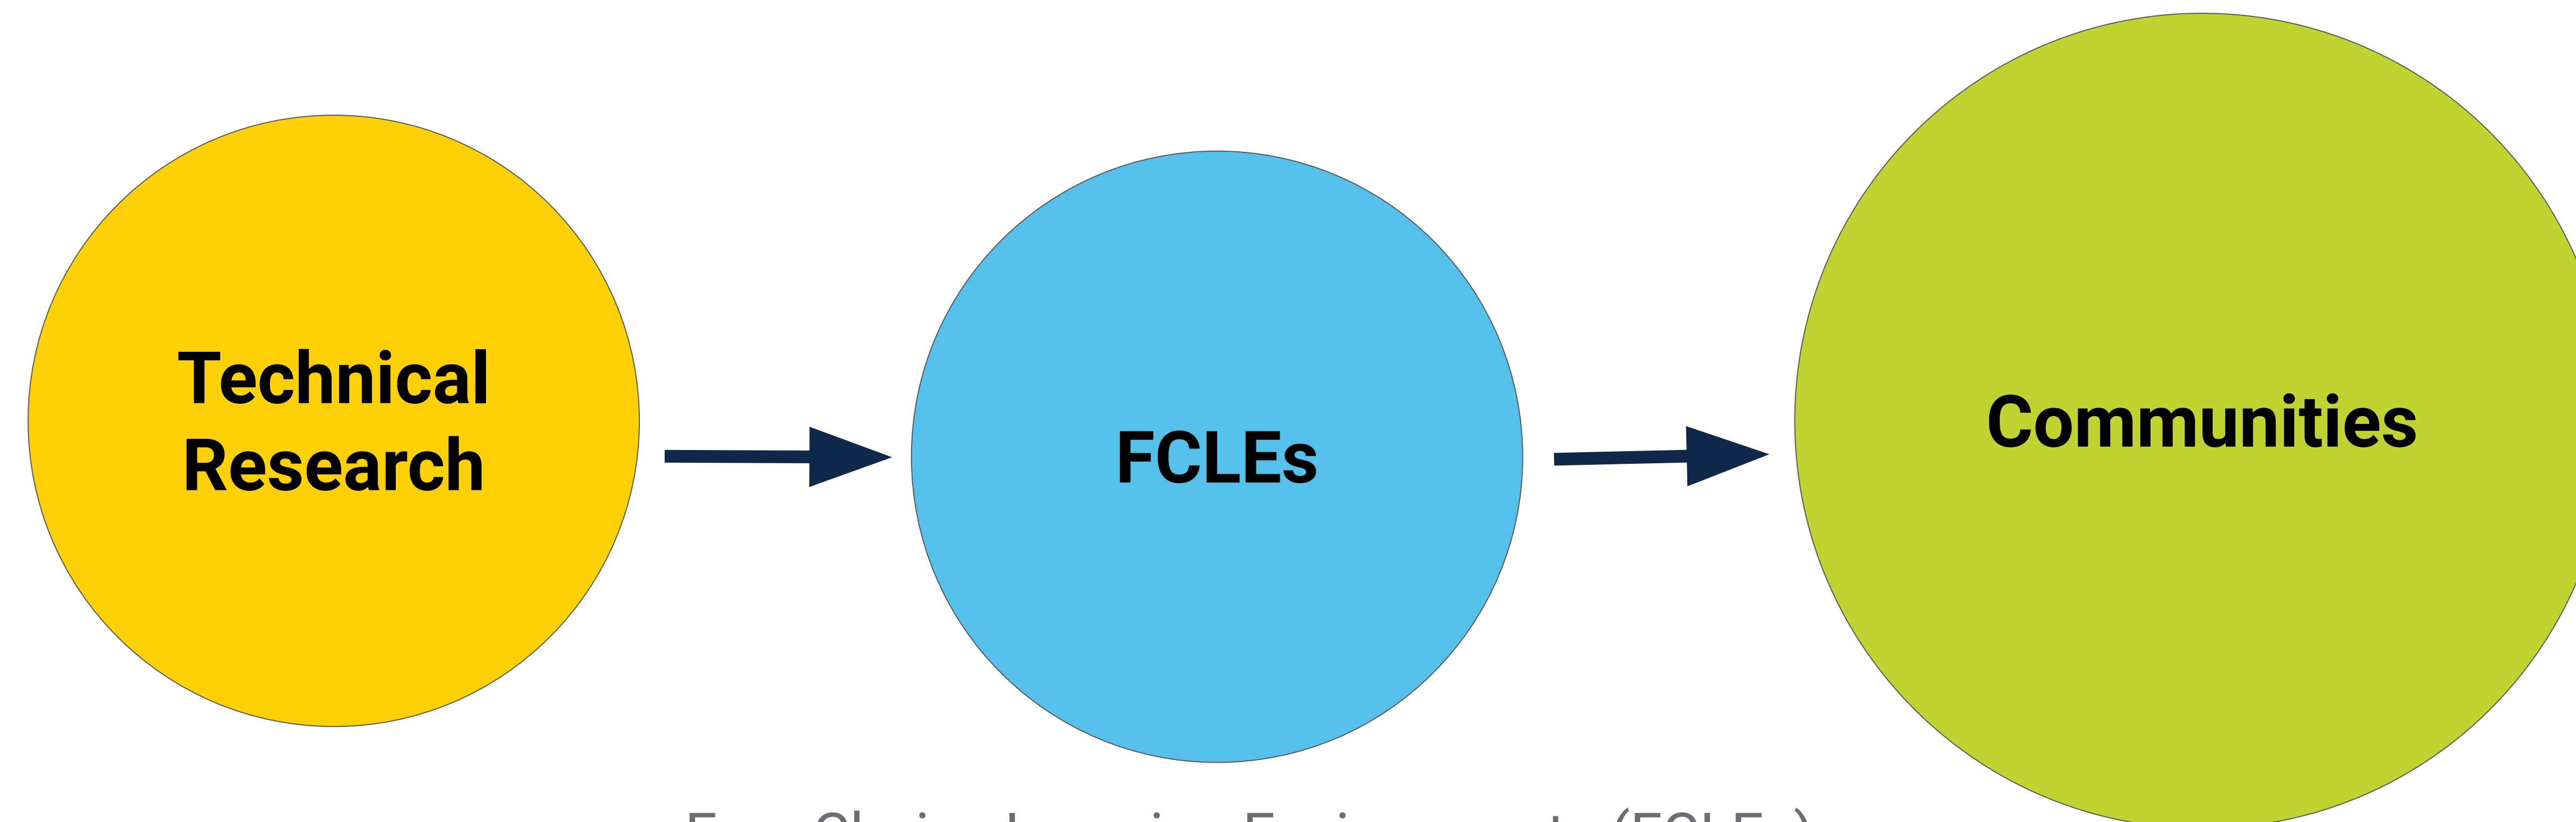

Museums, parks, and libraries have local knowledge, as well as trusting relationships with local communities. Local community members can inform and benefit from collaboratively learning to be prepared and safer during and after an earthquake.

Epicenter Partnership

The ShakeAlert® Epicenter Partnership is a network of museums, parks, libraries, and other FCLEs committed to promoting earthquake resilience in our institutions and communities.

This can include opportunities for researchers to share and communicate with FCLEs and the public.

The Epicenter Partnership offers monthly webinars, custom conversations and a playbook of creative activities.

Free-Choice Learning Environments (FCLEs) are spaces (physical or virtual) for learning outside the classroom.

How might you engage and why?
